Access & Goods Lift - 1000KG

SELF STORAGE GOES TO THE NEXT LEVEL

Strongroom Self Storage is pleased to announce the opening of their new facility in Salisbury. The former Timber Centre site at Hatches Lane on the Bourne Retail Park offers a range of different sized secure rooms as well as a selection of outdoor storage containers. Customers are assured of a friendly reception, 24-hour security and 24-hour security coded access to their own 'Strong Room' (a unique feature).

The £350,000 refurbishment includes the installation of a mezzanine floor, which doubles the storage area from 150 to 300 compartments.

Following a competitive tendering process Level Access Lifts of Southampton were commissioned to install a goods / wheelchair platform lift. Commercial Director of LAL Nick Dade said, " We were delighted to have been commissioned to install this lift. It was not without its challenges though. Our brief was to supply a lift that would be suitable for carrying people with disabilities and capable of carrying goods. When applying a lift with a high payload, we would usually have a lift shaft to fix to; in this instance we only had a mezzanine floor. The Solution was an A4 Flexa Mille which comes within its own structure and can carry up to 1000kg".

Nigel Hurst, Managing Director of Strongroom Self Storage said; "I can't speak highly enough of Nick and his team. Whilst we are very experienced in storing everything from house contents to building materials, caravans to boats, we don't know very much about fitting lifts. Nick worked tirelessly with our steel fabricators and electricians and kept me in the loop every step of the way. The lift went in ahead of schedule and we are so pleased with it that we have awarded Level Access Lifts an ongoing contract for our upcoming facilities, the next (which is now open for business) is at the former Renault Trucks building in Marchwood, Southampton".
